

**Boat should be free of all dirt, wax, polish, etc.
wipe entire area with alcohol with a lint free cloth. It cant be clean enough!
The wet method: you need a spray bottle with 2 or 3 drops of dish soap mixed with water.
you will spray the boat and the adhesive side of the vinyl eachtime before applying.**

For positioning the graphic before applying use painters tape or low tack masking tape. no packaging tape or permanent adhesive.

1

using the masking tape, set your centre. reference points for the main lower graphic.

2

using the masking tape, set your spacing under the rub rail . You can use 1/2" 1" 1.5" size etc tape to keep consistent spacing and to your liking from the rub rail down

3

Take the main centre graphic and tape into position with the masking tape. when happy with layout, tape down centre point. this will be your "hinge"

4

Take a side and peel away then cut the hard backing paper from the pre mask being careful to not let the graphic fold onto itself.

5

spray the back of the vinyl and the boat thoroughly so the vinyl will slip

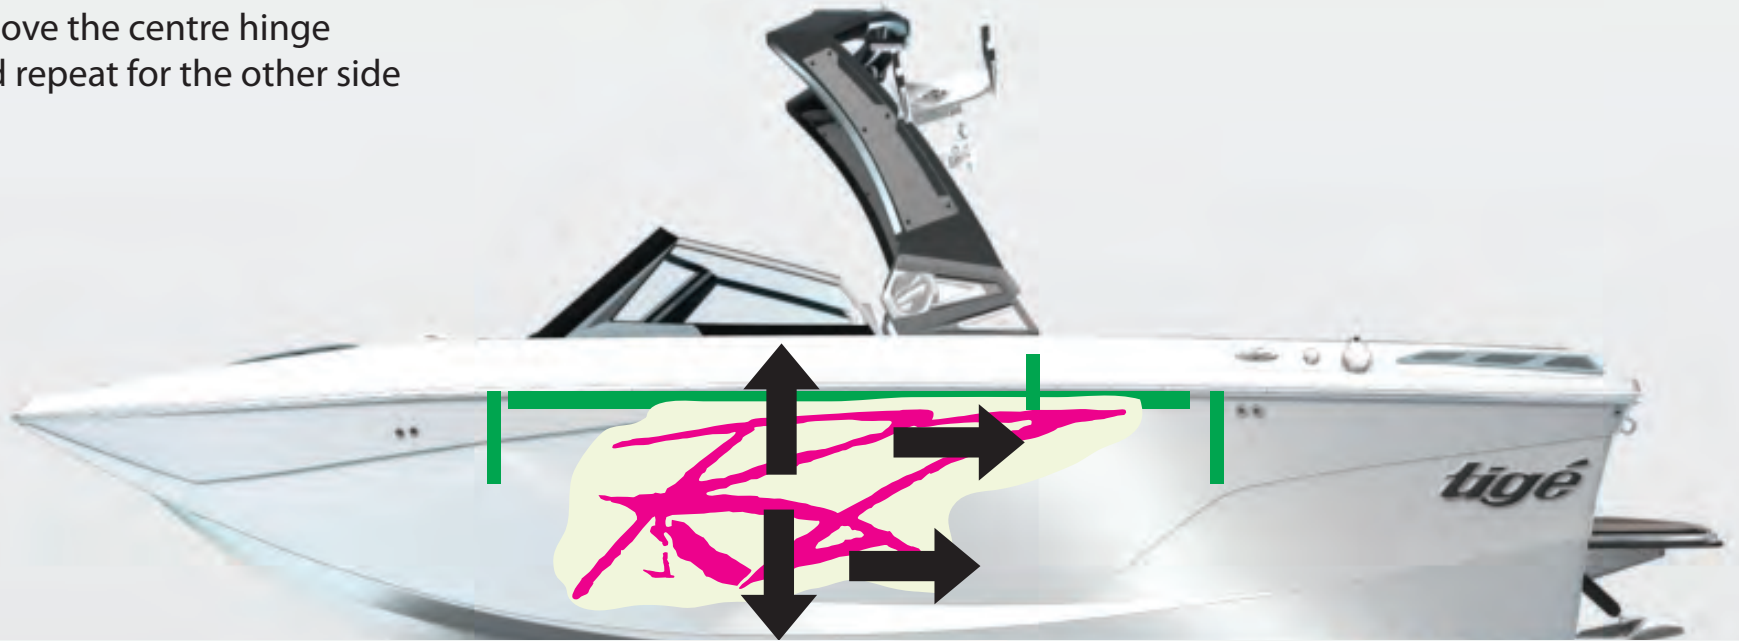

6

With overlapping strokes,
Using the squeegee press firmly up and down while moving forward pushing the water out underneath the vinyl.
if the premask top get dry spray the premask .
continue until you dont see any liquid coming underneath

7

remove the centre hinge
and repeat for the other side

8

Once most of the liquid has been removed
from the vinyl , you can remove the premask
starting from a bottom corner up.
If any vinyl comes up squeegee down some more
you can wet the premask to help it remove easily

9

Decal will now be in place. IMPORTANT!
IFA ANY BIG BUBBLES ARE UNDERNEATH
THE VINYL DON'T PRESS ON THE VINYL DRY.
SPARY THE TOP TO SMOOTH IT OUT OTHERWISE
YOU CAN MOVE/TEAR THE VINYL

Any smaller bubbles will dissaper
over time. Remember most people will
see the decal from at least 5 ft away so
small bubble wont be seen.

10

using the green tape as spacers
or using your preference repeat the process
for the other parts.
Tape everything in place and double
check before applying.
